**B.Sc (Nursing ) DEGREE EXAMINATION**  
**(New Regulations for the candidates admitted from 2006-07 onwards)**  
**Third Year**  
**Paper II – CHILD HEALTH NURSING**  
**Q.P. Code : 664722**

**Time : Three hours**

**Maximum : 75 marks**

**Answer All questions.**

**I. Essays:** **(2 x 15 = 30)**

1. Master John , 7 yrs male is admitted with diagnosis of nephrotic syndrome.
  - a) Define nephrotic syndrome. **(2)**
  - b) Explain pathophysiology and clinical manifestation of nephrotic syndrome. **(5)**
  - c) Describe the nursing management for master John. **(8)**
  
2.
  - a) Define preterm. **(2)**
  - b) Mention the physical and neurological characteristics of preterm. **(5)**
  - c) Draw the nursing care plan for the baby born preterm. **(8)**

**II. Write Short Notes on :** **(5 x 5 = 25)**

1. Nurses responsibility in promoting breast feeding among mothers.
2. Ten steps of baby friendly hospital initiative (BFHI).
3. Post operative care of baby with cleft lip repair.
4. Cryptorchidism.
5. Ophthalmia neonatorum.

**III. Short Answer Questions:** **(10 x 2 = 20)**

1. Define neonatal mortality rate.
2. Define protein energy malnutrition.
3. Mention four clinical manifestations of respiratory distress syndrome.
4. Write four complications of cirrhosis of liver.
5. Mention four signs and symptoms of rheumatic fever.
6. Mention four immediate management for epistaxis.
7. List four main characteristics of child with severe diarrhea.
8. Enumerate two signs of meningitis.
9. List types of tracheo-oesophageal fistula and atresia.
10. Two immediate management of kerosin poisoning.

  - a) Define Hydrocephalus and explain the pathophysiology of hydrocephalus.
  - b) List the classical features of hydrocephalus and explain the surgical management of baby Rani.
  - c) Draw a nursing care plan for baby Rani based on three priority problems.
  
2. Baby Kumari, a 5 months old child is admitted in a pediatric surgical ward with a diagnosis of pyloric stenosis.
  - a) Define pyloric stenosis and explain the pathophysiology of pyloric stenosis.
  - b) List the classical features of pyloric stenosis and explain the surgical management of baby Kumari.
  - c) Draw a nursing care plan for baby Kumari based on three priority problems.

**II. Write notes on:**

**(5 x 5 = 25)**

1. Trends in child care.
2. Otitis media in children.
3. Neonatal Resuscitation.
4. Welfare services for challenged children.
5. Wilm's Tumor.

**III. Short answers on:**

**(10 x 2 = 20)**

1. Expand DDST.
2. List the components of family centered care.
3. State any two differences between adult and child.
4. Write the formula to calculate weight of an Infant.
5. Name any two purposes of Kangaroo mother care.
6. Define croup syndrome.
7. State any two differences between Cleft Lip and Cleft Palate.
8. State classical features of Tetralogy of Fallot.
9. Define sickle cell crisis.
10. Enumerate the color coding system in IMNCI.

[LO 1023]

FEBRUARY 2019

Sub. Code: 4722

**B.Sc. (Nursing) DEGREE EXAMINATION**  
(New Regulations for the candidates admitted from 2006-07 onwards)

**THIRD YEAR**

**PAPER II – CHILD HEALTH NURSING**

*Q.P. Code: 664722*

**Time : Three Hours**

**Maximum : 75 Marks**

**I. Elaborate on:**

**(2 x 15 = 30)**

1. Baby Priya, 5 years old child is admitted to a paediatric burns ward with a diagnosis of 40% burns.
  - a) Define and classify burns in children.
  - b) List the method to estimate percentage of burns in children.
  - c) Explain the medical and nursing management of baby Priya.
1. A 4 year old girl is admitted in pediatric ward with diagnosis of Meningitis.
  - a) Define Meningitis.
  - b) Explain pathophysiology and clinical manifestations of Meningitis.
  - c) Describe Medical and Nursing management of child diagnosed with Meningitis.

**II. Write notes on:**

**(5 x 5 = 25)**

1. Concepts of child care.
2. Nephrotic syndrome.
3. Levels of neonatal intensive care.
4. Case management process.
5. Spinabifida.

**III. Short answers on:**

**(10 x 2 = 20)**

1. Write the formula to calculate drug dosage in children.
2. Classify congenital heart defects.
3. List any two differences between hemo-dialysis and peritoneal dialysis.
4. List the types of seizure in children.
5. Name the types of congenital hip dislocation in children.
6. Define thalassemia.
7. Define retinoblastoma.
8. State any four characteristics of toddler.
9. Write any four classical features of intestinal obstruction.
10. List any four common behavioral disorders in children.

**Time : Three Hours**

**Maximum : 75 Marks**

**I. Elaborate on:**

**(2 x 15 = 30)**

1. Baby Kamala 7 year's old child is admitted in a paediatric medical ward with a diagnosis of acute glomerular nephritis.
  - a) Define acute glomerular nephritis and explain the pathophysiology of acute glomerular nephritis.
  - b) List the clinical features of acute glomerular nephritis.
  - c) Describe the nursing management of acute glomerular nephritis.
  
2. Master. Senthil, 5 years old child is admitted in the paediatric ward for the treatment of Protein Energy Malnutrition.
  - a) Define Protein energy Malnutrition. List out the causes of Protein energy Malnutrition.
  - b) Describe the pathophysiology of protein energy Malnutrition.
  - c) Explain the nursing management including the dietary management of the child.

**II. Write notes on:**

**(5 x 5 = 25)**

1. Grief and bereavement.
2. Rights of children.
3. Principles of growth and development.
4. Well baby clinic.
5. Phototherapy.

**III. Short answers on:**

**(10 x 2 = 20)**

1. Expand BFHI.
2. List down four characteristics of pre-term baby.
3. Define child guidance clinic.
4. Difference between physiological jaundice and pathological jaundice.
5. Define Stridor.
6. Write four causes of Respiratory distress syndrome.
7. State four congenital disorders of gastro-intestinal system.
8. Define Rickets.
9. List any four restraints and its uses.
10. Difference between Tracheo-oesophageal fistula and Oesophageal atresia.

**I. Elaborate on:**

**(2 x 15 = 30)**

1. Master. Ramesh, 7 years old child is admitted in a paediatric medical ward with a diagnosis of rheumatic fever.
  - a) Define rheumatic fever and list out the causes.
  - b) Explain the pathophysiology and clinical features of rheumatic fever.
  - c) Describe the medical and nursing management of the child with rheumatic fever.
  
2. Master. Anand, one day old boy is admitted in a paediatric surgical ward with a diagnosis of tracheo-oesophageal fistula.
  - a) Define tracheo-oesophageal fistula.
  - b) List out the types of tracheo-oesophageal fistula.
  - c) Explain the surgical and nursing management of tracheo-oesophageal fistula.

**II. Write notes on:**

**(5 x 5 = 25)**

1. Theories of growth and development.
2. Play needs.
3. Rh incompatibility.
4. Assessment of dehydration.
5. Newborn care.

**III. Short answers on:**

**(10 x 2 = 20)**

1. Mention two classical signs of diaphragmatic hernia.
2. Define physiological jaundice.
3. List down four neo-natal problems.
4. Define Hirsprung's disease.
5. Expand APGAR.
6. Two purposes of incubator care.
7. List down the types of leukaemia.
8. List four common accidents in children.
9. Mention four causes of neo-natal sepsis.
10. Classification of high risk newborn.

*Q.P. Code: 664722*

**Time : Three Hours**

**Maximum : 75 Marks**

**I. Elaborate on:**

**(2 x 15 = 30)**

1. a) Define the idiopathic respiratory distress syndrome and list out the causes.  
b) Explain the pathophysiology, clinical features and diagnostic evaluation of respiratory distress syndrome. Draw a nursing care plan for a child with respiratory distress syndrome.
2. a) Define leukaemia and list out the types of leukaemia. Describe the pathophysiology and clinical features of leukaemia.  
b) Write the medical and nursing management of leukaemia.

**II. Write notes on:**

**(5 x 5 = 25)**

1. Neo-natal Reflexes.
2. Milestone development.
3. Assessment of New born.
4. Universal Immunization programme.
5. Haemophilia.

**III. Short answers on:**

**(10 x 2 = 20)**

1. List down the major criteria for diagnosis of rheumatic fever.
2. List down the congenital disorder of genito-urinary system.
3. Define Lanugo.
4. Mention four complications of fracture.
5. Define growth chart.
6. Define neonatal mortality rate.
7. List down the types of play.
8. Write the formula to calculate the degree of malnutrition.
9. Name the types of polio-myelitis.
10. List the principles of traction.
